

“ I have utilized the tools taught in the class to improve my daily interactions with all employees. I've seen substantial progress from a range of those employees, some of which have become quite the contributors to our Continuous Improvement Program. ”

TOOLS FOR CONSCIOUS LEADERSHIP: Proven Strategies for Improving Performance

Companies with engaged employees and leadership outperform others by:

22% in profitability
10% customer ratings
21% in productivity

Fewer safety incidents
Fewer defects
Lower turnover rates (Source: Gallup)

OMEP's Tools for Conscious Leadership is a transformational course based around the framework of a consistent daily management system. This program equips leaders to sustain continuous improvement gains by engaging and empowering employees

Designed for manufacturers who are committed to building and leveraging the business advantage of a continuous improvement culture, Tools for Conscious Leadership equips manufacturers with the tools to successfully set expectations, provide feedback and handle conflict. Ultimately you will learn how to step up as a leader to build an engaged workforce that results in higher profits, lower turnover, and better productivity.

This program is designed for companies that have embarked on a continuous improvement journey and desire to develop standard leadership behaviors to sustain their gain. We encourage companies to send at least three members of the leadership team that can commit to the entire program.

Session 1 - Performance Model: Behaviors and Expectations

Session 2 - Performance Model: Daily Management System

Session 3 - Personal Responsibility

Session 4 - Constructive Confrontation
