

INTRODUCING THE “CUE” and THE “CUE” PILOT PROGRAM

Cue is a small device, relatively the size of a pager, that aids companies in implementing safe social distancing practices, thereby reducing the risk of COVID-19 transmission at the workplace.

When worn, Cue gently reminds employees to maintain a safe social distance. If employees come into close proximity to one another, Cue will vibrate lightly. This vibration provides a 24/7 spatial awareness which aids and pilotely cautions employees to remain at a healthy distance from others in the workplace.

Small and unobtrusive, Cue is worn on the wrist, on a safety helmet, or a lanyard. Cue can also be attached to employee name tags/badges.

FEATURES

Cue is optimized for flexibility, affordability, and ease-of-use. We are also keenly aware of the privacy concerns that many people have about this kind of technology. For that reason, we have created Cue with the following features:

- **Zero-effort implementation.** All you need to do is put on Cue and turn it on; it works right out of the box.
- **Adjustable sensitivity.** Cue comes with three levels of intensity: Low, Medium, and High. On Low intensity, Cue will vibrate at 6 feet of distance. On Medium intensity, Cue will vibrate at 9 feet of distance. On High intensity, Cue will vibrate at 12 feet of distance.
- **Long-lasting, rechargeable battery.** Cue comes equipped with a long-lasting battery that can be re-charged with ease with a standard USB cable.
- **No Bluetooth/WiFi.** Cue doesn't rely on Bluetooth or WiFi. That means that you don't have to worry about data breaches, and your employees don't have to worry about being tracked.

HOW YOUR BUSINESS CAN JOIN THE CUE PILOT PROGRAM?

We are currently looking for partners to participate in our Cue Pilot Program. As a participant of the pilot program, you will be given several units of Cue for free in exchange for your feedback on how we can improve Cue. For more information, please email braum@safewithbonsai.com or call 302-668-6928.
